

REAL LIVE PINOCCHIO IN OKLAHOMA

(I thought Pinocchio was a boy?)

**OPEN ARTICLE TO KATHLEEN O'SHEA SPOKESPERSON FOR OG&E.
from JOE ESPOSITO 918-639-3421**

This story was on Fox 25 Thursday, February 21, 2013. "Couple says Smart Meter forced them out of their home." News report by Kisha Henry Fox 25.

*****OG&E says its Smart Meters have helped each customer save hundreds of Dollars.** Sounds good (always the Money angle), let's look at some of the real cost -- Health and Safety issues.

EMF Safety Network [Http:// emfsafetynetwork.org](http://emfsafetynetwork.org)

BioInitiative Report 2012: New urgent warnings on wireless and EMF public health risks. The 1,400 page report reviews over 1800 new scientific studies and includes 29 independent science and medical experts from around the world. Summary of Key Scientific Evidence: 14 points with "**Evidence for Effects ...**" Utility customers have reported new worsening health problems since the utility Smart Meter system has been installed on their home ...

- Sleep problems (insomnia, difficulty falling asleep, night waking, nightmares)
- Stress, agitation, anxiety, irritability
- Headaches, sharp pain or pressure in the head
- Ringing in the ears, ear pain, high pitched ringing
- Concentration, memory or learning problems
- Fatigue, muscle or physical weakness
- Disorientation, dizziness, or balance problems
- Eye problems, including eye pain, pressure in the eyes
- Cardiac symptoms, heart palpitations, heart arrhythmias, chest pain
- Leg cramps, or neuropathy
- Arthritis, body pain, sharp stabbing pains
- Nausea, flu-like symptoms
- Sinus problems, nose bleeds
- Respiratory problems, cough, asthma
- Skin rashes, facial flushing
- Urinary problems
- Endocrine disorders, thyroid problems, diabetes
- High blood pressure
- Changes in menstrual cycle
- Hyperactivity or changes in children's behavior
- Seizures
- Recurrence of cancer.

Let's look at a few of Monique Smith's issues after the Smart Meter was installed on their home, she had **NONE** of these issues before:

- ear pressure
- irritable bowel syndrome
- hypertension
- dizziness
- nausea
- nose bleeds
- severe headaches
- nerves in legs painful
- shooting pains in ovaries
- sternum pain
- neck/thyroid pain
- blurry vision
- foggy mind
- knee aches
- body feels as it is vibrating
- chest pains
- anxiety (hands shake)
- sweating
- depression

restless sleep ■ feels blood rushing through heart ■ lymph node pain ■ shortness of breathe. How and why can all these issues suddenly happen to one person?

Here is a quote from a medical professional that lectures for the medical education program on the dangers of wireless frequencies:

“Neuropeptides are the chemical equivalent of a biological communication system linking the nervous, hormonal and immune systems. When one of these systems is either strengthened or depressed the others will be affected profoundly. The nervous system is like an on off switch in that it runs on that positive / negative relationship of polarization and depolarization you have eloquently referred to numerous times. Once the depolarization process begins it not only impacts the nervous system communication but impacts the delicate hormonal and immune systems functioning as well. There are coherent frequencies and incoherent frequencies. The former has innate "orderliness" while the latter demonstrates a disorderly state. That's why we refer to someone as "incoherent" as being in a disordered state of consciousness. When a coherent bio-electric pattern becomes disrupted by frequencies that are nothing short of an electrical storm and assaulting the natural rhythms of the body, one's mental faculties become severely compromised. Unfortunately we are just seeing the beginning of an epidemic of highly dysfunctional and psychopathic behaviors.”

*****“It’s really a win-win for customers, says Kathleen O’Shea.Smart Meter system has helped each customer save hundreds of dollars...”**

Did I miss something here? Win-win--save dollars! It appears to me to be SEVERE PAIN AND SUFFERING AND DEATH, causing ASTRONOMICAL COST to utility customers!!!

Looks like we need the analog meters back with their human meter readers and eliminate the Smart Meters so the customers preserve their health, their lives, and save their money-----HELLO Kathleen O’Shea.

This just gets better and better.

*****“It’s not much different from what customers had on their houses before,” says O’Shea**

What customers had on their houses were Mechanical Analog meters that never created ANY PROBLEMS and never caused ANYONE A MYRIAD OF HEALTH ISSUES. HELLO! Kathleen O’Shea “not much different”? Is this why 18 or more states have citizen groups organizing across all political, cultural, and religious lines to STOP Smart Meters? Law suites, local police arresting citizens, forced ill health, pain and suffering and perhaps death caused by Smart Meters. Even a

home owner in Guthrie, Oklahoma had 3 police officers arrive at his home, handcuffed him while forcing the installation of a Smart Meter on his home against his will. HELLO! Kathleen O'Shea "not much different"? The State of Maine's Supreme Court just ruled the Power Company has to address the HEALTH ISSUES of their customers, the State of California has 57 municipalities, of which 11 have passed ordinances making installations of Smart Meters **ILLEGAL**, of which 2 proclaimed them **CRIMINAL**. Is this why **STOP SMART METERS IN OKLAHOMA.ORG** has just been organized?

***"She says Smart Meters contain a little card that transmits data.... .

Kathleen O'Shea Smart Meters ARE MICROWAVE ELECTROMAGNETIC RADIATION TRANSMITTING DEVICES AND THERE IS NOT **ONE** BUT **TWO** MICROWAVE ELECTROMAGNETIC RADIATION TRANSMITTING DEVICES in each Smart Meter. One is called a Local Area Network (LAN) 900MHz which travels for miles and goes through everything - people, adults, children, plants, insects, and animals. The other is a Zigbee 2.4 GHz which travels hundreds of feet, this is the most damaging to human life. These two MICROWAVE ELECTROMAGNETIC RADIATION TRANSMITTING DEVICES are causing all the **above problems**.

Don't forget the two-way communication system between the cell tower antenna, the **collectors** that cover 125 sq. miles, the **rotters** that cover 5 sq. miles and the mesh grid network of Smart Meters all emitting MICROWAVE ELECTROMAGNETIC RADIATION 24/7 negatively affecting all biological life.

***"The radio frequencies from the meter are well, well below what the FCC has as a limit, says O'Shea." (The FCC like Safety Code 6 in Canada both talk only about thermal effects not the biological effects.)

Kathleen O'Shea we noticed you said "the radio frequencies", instead of using the term SAFETY STANDARDS. "Radio frequencies" is a passive term, however, the MICROWAVE ELECTROMAGNETIC RADIATION TRANSMITTING DEVICES are active two-way transmitters and receivers in a MESH GRID NETWORK where all the home SMART METERS talk to each other from 17,000 times to 190,000 times a day. That is why they are mandatory. All the local Smart Meters talk to each other starting from the most distant Smart Meters in the network, passing all the information from one to the next through your homes as it travels to its destination. You don't want to be toward the end of the information flow due to the shear volume of radiation going through your home and family.

Also, Jerry Flynn, a Retired Canadian Armed Forces Captain (CFRI), spent 22 years of his 26 year military career in SIGINT, Radio Warfare & Electronic Warfare, presents revealing, unparalleled knowledge in the area of electromagnetic frequencies on this YouTube video (Jerry Flynn Smart Meters 1:27min) The following is some of his information.

U. S. Embassy in Moscow 1953-1976

(6-8 hours a Day, 5 Days a week)

- *Embassy was radiated with m/w frequencies at power levels between 2 and 28 uw/cm² (1/100) of what Canada and U.S. now permit!
- *Two consecutive U.S. ambassadors died of cancer;
- *Third developed leukemia-like blood disease and bleeding eyes and eventually died from it;
- *At least 16 women developed breast cancer;
- *Many other staff suffered immune system disorders, high white blood cell counts, chromosomal breaks, chronic fatigue, blurred vision, cataracts and muscle aches.
- *U.S. knew but didn't warn embassy staff for 10 years!

By 1971, the **U.S. Naval Medical Research Institute (NMRI)** referenced 2,300 research articles listing more than **120 illnesses attributed to radio frequency and non-ionizing microwave radiation.**

In 1975, the **U.S. Defense Intelligence Agency (DIA)** warned all its personnel of the risk from low level microwave radiation i.e., illnesses ranging from microwave sickness, flu-like symptoms, depression, suicidal tendencies, to cancers and leukemia.

Barrie Trower: "A 1976 Document summarizing U.S. Defense Intelligence research is the saddest and most despicable document ever published in history." The document lists all of the health hazards caused by wireless devices and concludes: "This should be kept secret to preserve industrial profits." Trower also cited a 1950's report stating: "If this paper becomes known around the world, it will Threaten Military and Commercial interests." He especially condemned Health Canada's Code 6, stating that the science based safety level published in the BioInitiative Report is 0.1uw/cm² Not Canada's 600 to1,000 uw/cm²!

*****The following is an 18 page document, persons need to take the time to read this in its entirety. A few short sentences were selected to show the topic of the article being discussed.**

**DEPARTMENT OF THE ARMY
UNITED STATES ARMY INTELLIGENCE AND SECURITY COMMAND
FREEDOM OF INFORMATION/PRIVACY OFFICE
FORT GEORGE G. MEADE, MARYLAND 20755-55995
DECEMBER 13,2006
UNCLASSIFIED**

Your Freedom of Information Act (FOIA) request dated May 25, 2006 to the Department of the Army, Freedom of Information/Privacy Division (DA FOIA/PA DIV), for all documents pertaining to the microwave auditory effect, microwave hearing effect, Frey effect, artificial telepathy, and/or any device/weapon which uses and/or causes such effect; and any covert or undisclosed use of hypnosis.

Bioeffects of Selected Nonlethal Weapons (fn 1)

***-----**

***Radiofrequency directed energy**

***-----**

- The study of electromagnetic fields and their influence on biological systems is increasing rapidly. Much of this work is taking place because of health concerns.**
- In addition, much concern has arisen about extremely low frequency (60 Hz power frequency) electric and magnetic fields that originate from high-voltage transmission lines, industrial equipment, and residential appliances.**
- The studies have suggested possible adverse effects on human health (e.g., cancer, reproductive, etc.).**
- There is, however, a growing perception that microwave irradiation and exposure to low frequency fields can be involved in a wide range of biological interactions.**
- Clearly, the effects of microwaves on brain tissue, chemistry, and functions are complex and selective.**
- Recent published data implicates microwaves as a factor related to a deficit in spatial memory function.**
- The challenge is to minimize the time to effect while causing no permanent injury to any organ or the total body and to optimize the equipment function.**

- This controlled heating will raise the core temperature of the individuals to a predetermined level to mimic a high fever with the intent of gaining a psychological/capability edge on the enemy, while not inflicting deadly force.
- Incapacitation time could be extended to almost any desired period consistent with safety.
- No reason has been identified to suggest that anyone would be immune to this technology.
 - Microwave hearing is a phenomenon, described by human observers, as the sensations of buzzing, ticking, hissing, or knocking sounds that originate within or immediately behind the head.

-Since this technology utilizes radiofrequency energy, it can be DEFEATED by the use of shielding provided by conductive barriers like metal or METAL SCREEN.

- Not only might it be disruptive to the sense of hearing, it could be psychologically devastating if one suddenly heard “voices within one’s head.”
- It is anticipated that 100% of the population would be susceptible.

I would like to address the METAL SCREEN TO DEFEAT THE MICROWAVE RADIATION WITH THE SHIELDING EFFECTS.

On January 8, 2013, we delivered a 17 page information packet addressing these very issues to the entire Legislature, Governor, Lt. Governor, and the Corporation Commission. U.S. Senators Inhofe and Coburn also U.S. Representative Bridenstine have received this document.

In that information there is my personal 3 page health testimony of my problems with the Smart Meter. On Nov. 7, 2012, was the first time I understood what was happening to all of us. “Smart Meters & EMR The Health Crisis of our Time” Dr. Dietrich Klinghardt Youtube 43min. Dr. Klinghardt made a suggestion on how to shield your house from the Smart Meter and I followed his suggestion. The first night within 6 hours my two MAJOR symptoms left and have NOT returned in four months. The next thing I did was build a Faraday Cage out of aluminum window screen wire, and the cage is grounded. The Smart Meter readings are as high as 2000 uw/m² (SM) outside my house, inside the cage it is .1uw/m² which is a very safe sleeping area at night. Nighttime is when most of the damage occurs to our bodies.

The BioInitiative Report (1,400 pages) recently published says **3.4 uw/m2** causes sperm damage, **Dr. Dietrich Klinghardt** has said if a pregnant woman is in a room at night and if the reading is above **5uw/m2** (is not acceptable) he can predict the chances of an AUSTIC CHILD, also that 80% of health issues are being caused by EMRs that have never been studied for safety. The Smart Meters are not tested or approved by UL or equivalent, in any known region, despite this being a legal requirement.

He says on installation of the Smart Meters we've seen: * TGF-Beta 1 increase (inflammatory marker) * MMP-9 increase (inflammatory marker)

* Copper increase (inflammatory Marker) * Hormone abnormalization

* Neurotransmitter abnormalization

The Studies are showing these EMRs are changing 143 proteins in the brain and they will never be the same!

*** As soon as a Smart Meter is installed---Lab test show after 6 months the person looks like a dying person---even if a person says my wife is sick, but I am OK, the test shows that he is just as sick.

The point being -- the standard for all this was a thermal application not a **BIOLOGICAL SAFETY ISSUE STANDARD. There never has been any studies to see how little of this kind of radiation it takes to damage human life.** If they had an equation they used to come up with the current limit, they left out a large portion of facts pertaining to the BIOLOGICAL EFFECTS. Meaning the current application of CANADA and the U.S. FCC health standards are NOT VALID. These standards have not been evaluated for effects on Biological life, including human. What about people like me who have 7 Wi-Fi's beaming from their neighbors or an apartment complex having hundreds of Wi-Fis? What about the poor soul who has 16 Smart Meters on the outside wall of an apartment complex against their bedroom wall? What about where you and your wife lay your heads at night, the reading could be as high as 2000 uw/m2 of pulsed microwave radiation being emitted every 30 seconds and stays on for 17-20 seconds and her eyes are deteriorating with spots and changes to the eyeball itself? The only way a person would know the frequencies are present and causing physical damage is by using a high frequency microwave radiation meter analyzer to read the frequencies, **making the unseen, seen.**

***“radio frequencies from the meter are well, well below what the FCC has as a limit” Point being **Kathleen O'Shea**, the Smart Meters and their 24/7 networks plus looking at **ALL** these other technologies is now causing the killing

fields to all biological life. Not one organization involved with Smart Meters, OG&E, Corporation Commission, FCC, the meter manufacturer, any agency of the Federal Government, not one, nada, zero, zip....have looked at the impact on **human life or biological life in any form**. If they have, they have classified it and hushed it up. Those are facts. It is to OG&E's benefit to deny that there are any health effects. When study after study shows that there will be a minimum of 3% to 5% of Humans who automatically will be susceptible or sensitive to the radiations from the meters, and many more studies that show the radiation is in fact harmful to **all life**. **The level set by the FCC will not protect life as we know it**. OG&E had to be aware of all the research and studies, yet made a decision to implement this program in a manner most harmful to human life. It has pursued implementation of this program **against** the citizens of Oklahoma, and their service area, with tyrannical power that reflects a mindset that is only matched by Nazi storm troopers.

As Jerry Flynn says, "Before one can discuss proposed wireless microwave radio technology, one needs to stop, step back and realize that our society is already awash in a seemingly endless array of wireless transmitting and receiving devices - all of which emit toxic electromagnetic radiation (EMR). On May, 2011, the World Health Organization (W.H.O.) classified EMR - all EMR, regardless of the emitter - a Class 2B ("Possible") cause of cancer. That includes all of our present day devices, such as: AM and FM radio broadcast antennas, radars, cell phone towers, cell phones, Smart Phones, cordless phones, Wi-Fi routers, laptop computers, iPads, tablets, baby monitors, home security systems, Bluetooth, garage door openers, RFIDs, satellite radio and TV, microwave ovens, GPS satellites, Wi-Fi hot spots, Wi-Max, Tetra radio towers, X-rays, CT-Scans, MRIs, etc."

Not only do we have Smart Meters on our homes, but also in the near future they will be on our gas and water meters. "The MICROWAVE ELECTROMAGNETIC RADIATION coming from the Smart Meters, Kathleen O'Shea, contribute to the fact that WE ARE SWIMMING IN A HUGE TOXIC SOUP. I checked a lady's house, who is very sick, in Oklahoma City that has three large wired power lines in her very small back yard (north), her Smart Meter is on the outside of her house opposite her kitchen sink, to the southeast of her home is a FM radio station, which I could hear playing on my HF analyzer just as if it was a radio receiver, a huge cell tower to her (west) very close to the ground with residents all around the tower, these transmit for miles.

*****"She says cell phones actually emit more of a signal than the Smart Meter." Really, My Smart Meter is transmitting every 30 seconds and stays on for 17-20 seconds 24/7 and that is more than my cell phone?**

The point being is the FCC has never looked at the whole picture of MICROWAVE ELECTROMAGNETIC RADIATION and the effects to human health.

Let's keep all this in the **RIGHT** perspective, remember the BioInitiative Report states 3.4 uw/m² causes sperm damage, Dr. Dietrich Klinghardt said, a sleeping room of a pregnant women needs to be **BELOW** 5 uw/m² to be safe from the possibility of an autistic child. Also, if one goes to the country away from all the EMRs the readings around rural houses are as low as 2, 3, and 5- uw/m². In an enclosed metal building the reading usually is .1 uw/m², which is better than my .4 uw/m² in my faraday cage where I sleep. At my house, in Owasso, near the Smart Meter readings show as high as 2000 uw/m² pulsed microwave radiation being emitted, now looking south to the cell tower on 96th street north, my meter reading stays high, pulsing as high as 700 uw/m² constantly being received or transmitted. Near the Smart Meter if my Gigahertz meter is set on the 200uw/m² setting my meter pegs every 30 seconds and stays on for 17-20 seconds.

Billy Smith monitored his house for 5 minutes between 9:15 pm to 9:20 pm on Feb.20, 2013 with the following results: Every 10 seconds the meter pegged out (meaning its over) 2,000 uw/m². **"It's not much different from what customers had on their houses before," says O'Shea." Oh, Really!!!**

Kathleen O'Shea let's do a little field test. I will call Billy Smith and ask him if you and the CEO (Pete Delaney) of OG&E can come out to his house and both of you stand 6 inches from his Smart Meter for one hour at the time of day Billy requests. Without adjusting or making any different setting to his meter, NO protective clothing or any kind of shielding, and OG&E not turning the meter off and lets just see what **HAPPENS** and how **SAFE** it is to be around. Kathleen O'Shea ***Remember "It's not much different from what customers had on their house before."

-WHY HAVE WE NOT HEARD ANYTHING ON THIS ISSUE FROM THE STATE LEGISLATORS, THE GOVERNOR, THE CORPORATION COMMISSION?
MAYBE THEY NEED TO HEAR FROM THE PUBLIC!

-THERE NEEDS TO BE LAWS AGAINST THIS CRIMINAL ABUSE.

-THERE ARE LAWS AGAINST PEOPLE COMING INTO YOUR HOME AND HARMING YOU AND YOUR FAMILY. SMART METERS ARE COMING INTO YOUR HOMES AND HARMING YOU AND YOUR FAMILY, AND IT MUST BE STOPPED THIS LEGISLATIVE SESSION.

-WHEN THE PHONES OF OUR ELECTED OFFICIALS ARE SO **CONGESTED** (IF IT TAKES A CALL A DAY) THEY WILL NEED TO ADDRESS THIS ISSUE.

HEALTH/SAFETY/PRIVACY ARE BEING DESTROYED FOR PROFITS OR POPULATION CONTROL

ARE SMART METERS NIKOLA TESLA'S "DEATH RAY"?

(Look up NIKOLA TESLA'S "DEATH RAY" on WIKIPEDIA)

The following is a primer exposing what is taking place in American today.

Purpose of Smart Meters:

Smart meters, are part of the smart grid, which is a UN Agenda 21 program item. It is designed for collective (socialized) control of a person's utility usage. It is also designed to increase cost of the utility consumed. With global or central control of utilities, populations can be manipulated. In America this has come about because environmentalist with their social justice agenda have prevented the building of affordable power generation plants, but have offered the smart meter as a means to ration the utility to meet the socialistic desires of the one world order. To be successful in their control plan, the globalist must conquer the U.S. The U.S. by necessity, must be turned into the globes largest third-world nation. Why do our businesses pursue this? Because the government is paying them to do it. Thus you have these wonderful smart meter programs, and many other programs that take away individual **Liberty**, and in the case of Smart Meters, individual **Health** and **Safety**.
